SOFTWARE ENGINEER

Passionate Software Engineer with two years of combined internship and professional experience in Database Administrator and full-stack development, specializing in MySQL, React JS, Java, and Golang. Adept at designing and optimizing databases, and experience in deploying applications using personal servers accessed via SSH with Termius. Actively seeking opportunities to transition into a dynamic software engineering role, where I can leverage my broad skill set and foundational knowledge. Committed to rapidly advancing my proficiency in backend system development and integration, bringing a dedicated, adaptable, and innovative approach to tackling new challenges.

TECHNICAL SKILLS

Programming Language:

HTML, CSS, Golang, React JS, Java

Database:

MySQL

Other Tools:

Git, Postman, Docker, Termius

Language:

Bahasa Indonesia (Native), English (Fluent in Speaking)
